

report of Australia

Mabel Park State High School

I thought Australian high school students consider well what profession they want to be. And, they have considered it since they were junior high school students. However, most of Japanese high school students cannot decide their profession because we don't have the opportunity to consider them a profession. So, I thought that Japanese people need to think about what they want to do in the future, not just take college entrance exams.

Language School

We had a placement test in AICOL. I went to a high level class. There were Chinese students in my class. I have been studying since I was 13 years old, but they've been doing it since they were children. So, they are good at speaking English. I thought how to study practical English is to speak English more.

Homestay

My host family is from New Zealand. So, their English is difficult to listen to. But Australia has a lot of immigration. So I thought I should be able to listen to other pronunciations. And, we should tell them yes please or no thank you. Because the host family is not a hotelman and a store clerk. So we have to tell them thank you.

What I learned through this program

I learned a lot of things through this program. I noticed my English skills were not useful. When I was spoken to by other students, I couldn't respond not at all. I thought It is no longer a matter of course to pass the first grade of the English Proficiency Test. I want to go to Australia again. So, I decided to study English and Australian cultures.
