

School trip in Okinawa

① I went to Salt Factory Nuchi Masu. The salt is like snow, Nuchi means life, Masu means salt in Okinawa, Nuchi Masu contains 21 kind of minerals. It entered the Guinness Book of Records in 2003. The salt is very delicious. So we like it.

② This is a picture of the ocean. The reason I took this picture was because it was the only moment when the sun came out. I was happy to be able to see the beautiful ocean and scenery.

③ I ate the famous ice cream in Okinawa. It's called Blue Seal. This picture shows ice cream flavored with salt Chinsuko and sugar cane. It became an unforgettable memory of Okinawa✧✧

④ I went to Churaumi Aquarium. There was a very big whale shark there. I was surprised that it was more powerful than I saw in the picture. I like to see rays.

⑤ I went to the beach. There was large and a beautiful view. I couldn't find fish. But, found a lot of hermit crabs. They were small and cute. So, I caught by my hand. Then, I was sandwiched my finger by them. It was very painful.

⑥ I went to Kakazu. There are Observatory with a view of the US military base. There I was surprised to see cherry blossoms even though it was winter. In Kanagawa, the cherry blossoms are in full bloom in April, but I heard that in Okinawa it is in January.

⑦ I ate soki soba. Soki soba is a traditional food in Okinawa. It was very delicious. It is topped with red ginger, and it goes really well with it. I ate the noodles for the first time. I want to eat one more time.
